SECURE PAYMENT and COLLECTIONS

To ensure secure payment on our store, we have selected several payment methods (Credit Card, Bank Transfer, Check, PayPal).

SECURE ONLINE PAYMENT

When you select the "Credit Card" payment option on our website, you are automatically redirected to the secure server of our service provider. Your bank card information is encrypted using the 256-bit SSL (Secure Socket Layer) protocol, the most widely used solution worldwide. This information is not communicated to us. Your card number never circulates "in plain text" on the Internet, and no one can access it without your knowledge.

When placing an order, only the essential information (name, first name, address, e-mail) is requested to ensure efficient processing and careful tracking of your order. The data entered online is recorded on a secure server and immediately encrypted.

Financial data transmitted by phone is systematically destroyed right after the end of the transaction.

If you prefer not to pay online or by phone with your credit card, you can also complete your purchase using other available methods: check, bank transfer, postal transfer, or money order.

COLLECTIONS

For payments made by credit card: your account is charged immediately by our service provider. Goods are shipped within 48 hours unless out of stock.
